

**You have the right to receive a “Good Faith Estimate”
explaining how much your medical care will cost.**

Under the law, health care providers need to give patients who don't have insurance or who are not using insurance an estimate of the bill for medical items and services.

- You have the right to receive a Good Faith Estimate for the total expected cost of any non-emergency items or services. This includes related costs like lab tests, nutritional supplements, and office visits and treatment fees and more.
- Make sure your health care provider gives you a Good Faith Estimate in writing at least 1 business day before your medical service or item. You can also ask your health care provider, and any other provider you choose, for a Good Faith Estimate before you schedule an item or service.
- Initial intake (history, examination and medical decision making) visits with Dr. Gordon ranges from \$250-\$500 depending on the complexity of your case. We will not be able determine the complexity of your case until you are actually seen in this office.
- After your initial intake (history and examination and medical decision making) with Dr. Gordon, she will provide you with her recommendations for care and an estimated cost for that care. We will not provide you with the services or items unless you agree to receive them.
- If you receive a bill that is at least \$400 more than your Good Faith Estimate, you can dispute the bill.
- Make sure to save a copy or picture of your Good Faith Estimate.
